NOTICE TO U. S. MAIL CONTRACTORS AND THE PUBLIC.
AUDITOR'S OFFICE, POST OFFICE DEPARTMENT,
November 1, 1853.

IT HAS BEEN LONG THE PRACTICE of this office to pay the drafts drawn and negotiated by contractors for the United States mails, for the amounts, respectively, of their quarterly pay. It was established to accommodate the contractors, and meet their necessities, in advance of the regular disbursements, by paying by the draft, a warrant of the department, and was intended only to apply to one draft per route from each contractor for the whole amount, deducting lines, collections, &c., of his quarterly pay; but it has been found that this practice has been misunderstood, and is supposed to allow any number of drafts, and for any amount, not exceeding in the aggregate, the contract pay for the quarter. A privilege has been thus afforded for the contractor to draw as many drafts as he pleases, and to draw for any amount, not exceeding in the aggregate, the contract pay for the quarter. It is therefore deemed proper to give this public notice to contractors, and all concerned, that from and after the 1st day of January, 1854, but one draft for the pay upon each route per quarter will be paid, or allowed for settlement. The draft would stand upon its face, that it is the only one for the quarter and the route (both to be specified) upon which it is drawn; and the signature thereon should be countersigned by the postmaster at the place where it is drawn, and the signature of the contractor, and the signature of the postmaster, should be countersigned by the postmaster.

WM. F. PHILLIPS,
Auditor of the U. S. Mail Department,

PATENT GAS REGULATOR.—The inventor (Dr. Kidder) of this economical and useful instrument, deserves the thanks of the gas-consuming community. The saving effected by the use of it will be found fully 25 per cent. in every person's gas bill. It can be so adjusted as to supply the gas at any desired pressure less than that of the street, and when once adjusted, the Regulator will continue to supply the gas at that pressure uniformly, without requiring further care or attention, and independent of all the fluctuations of the street pressure. In an additional advantage obtained by this Regulator is a light of more agreeable quality, in place of the bluish white color of the ordinary gas light, occasioned by the high pressure at which the gas is consumed. As an evidence of its practical utility, it is now in operation in some of the principal hotels and large stores in New York city, who all bear favorable testimony to its value. It has also received the united commendations of the press.

Hotel proprietors and storekeepers in the city of Washington and its vicinity, desirous to avail themselves of the economical, can obtain all further information by calling on the subscriber, who has fitted one of these Regulators up in his store, and will give an illustration of it.
